Sub-Project No: IUGIP/DAGA/UT+DR /01/2023

DAGANBHUIYAN POURASHAVA, FENI

CURRENCY EQUIVALENTS

(As of February 2024)

Currency Unit - Tk.

Tk1.00 - \$0.0093 \$1.00 - Tk. 105.40

GLOSSARY OF BANGLADESHI TERMS

One (1) Crore - 10 million (= 100 lakh)

Ghat - Boat landing area along a river. Market (bazaar) operating

certain afternoons during the week when sellers establish temporary shops. There are also some permanent shops in a Hat. Markets usually represent a significant source of

income for municipalities

Khal - Drainage ditch/canal

Khas - Land/property belonging to government

Kutcha - Structures built without bricks and mortar or without

concrete

Lakh or lac - 100,000

Mohalla or Mohalla - Sub-division of a ward

Mouza map - Cadastral map of mouza showing plots and their numbers

Pourashava or Pourashava - Government-recognized land area

Pucca or Kuccha, - Structures built partly with bricks and mortar or concrete

Thana - Police station

Upazila - Administrative unit below the district level. A district is

called a Zila

WEIGHTS AND MEASURES

Km - Kkilometre

m - meter

m² - Square Meter

mm - Millimeter

m³ - Ccubic meter

NOTES

- (i) In this report, "\$" refers to US dollars,
- (ii) BDT refers to Bangladeshi Taka

I. INTRODUCTION

1. This is the Involuntary Resettlement (IR) report for the Roads & Drains sub-projects-under the-Package: IUGIP/DAGA/UT+DR/01/2023, Total Roads length is 1,988m for three (3) main Roads and 1,040m for two (2) drains for Improving Urban Governance and Infrastructure Program (IUGIP) of LGED. The present proposed selected roads comprise: R-2, R-87, R-90 and selected Drain DR-1, DR-87 of Ward numbers: 1,3,4,5, of the proposed list of the Daganbhuiyan Pourashava. The total length of Three (3) roads: 1988m and two (2) drain: 1040m.

A. Project Background

2. Daganbhuiyan Pourashava is one of the selected Pourashavas under Improvement Urban Governance and Infrastructure Program (IUGIP) of LGED financed by ADB, AFD and GOB. The objective of the MDSC is to prepare an agreed project design and feasibility study, inclusive of the preparation of a sizeable number of infrastructures sub – projects which would warrant satisfying and in compliance with the pertinent requirements and policy of ADB (SPS-09) and GOB. The MDSC will also include preparation of SPAR (Subproject Appraisal Report) and having conformed to the Resettlement, social safeguard, gender, poverty and other issues for the ensuing loan.

B. Urbanization and Social Safeguard and Resettlement/Rehabilitation Needs

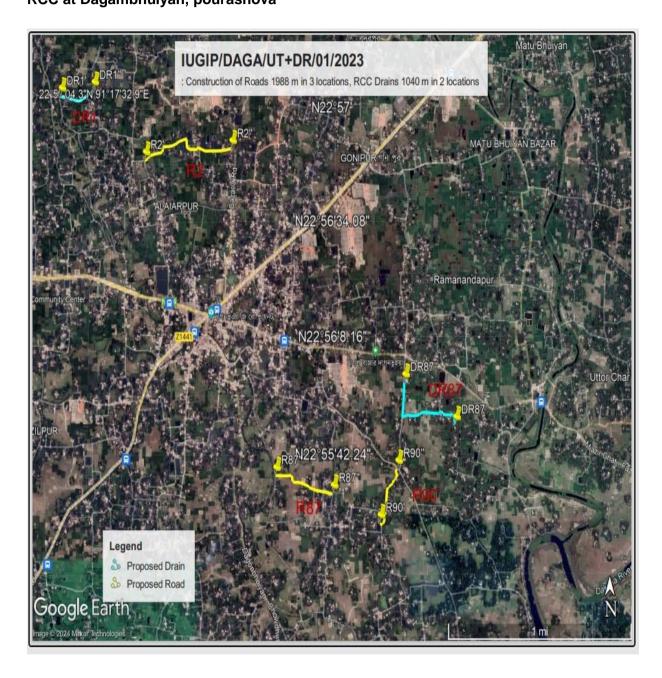

3. There has been a significant influx of people in search of better livelihoods to the Pourashava urban areas and district headquarters which include Daganbhuiyan Pourashava of Feni district Near the Comilla City. Being a part of Feni district and adjacent to Comilla and Chattogram City Corporation, many small industrial establish are gradually developing within the Pourashava area of Daganbhuiyan. the population of the area is steadily increasing due to civic amenities. In this, unplanned housing is being built everywhere in the Pourashava area. It is becoming difficult for Pourashava to provide Paura services. For growing needs of urbanization municipal facilities and development are essential. Physical, social and economic displacement an inevitable part of development and may cause involuntary resettlement resulting physical and economic displacement and the issues should be properly mitigated for avoiding development-based suffering of the urban people.

C. Project Location

4. This road and drains Sub-Project have been proposed comprising construction and improvement of 3 road schemes and 2 drains comprises: R-2, R-87, R-90 and selected Drain DR-1, DR-87 of Ward numbers: 1,3,4,5, of the proposed list of the Daganbhuiyan Pourashava. The total length of 3 roads: 1,988 m and two drains: 1,040m.

Improvement of 1,988m Road in 3 locations by DBC, 1,040m Drain in 2 locations by RCC at Dagambhuiyan, pourashova

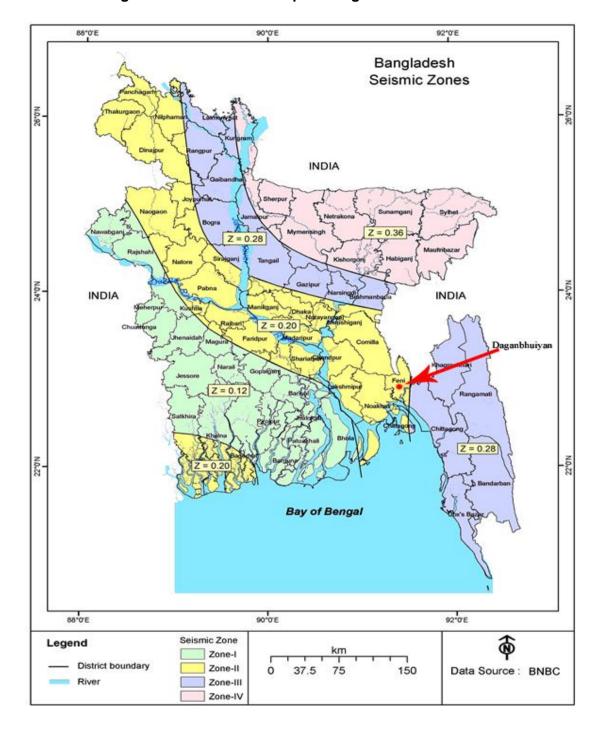

Figure 2: Seismic Zone Map of Bangladesh BNBC -2020

5. Dagonbhuiyan Pourashava is located in a seismic Zone II, referred to as the low-risk zone for earthquake in the country. Seismic events in Bangladesh are relatively infrequent, but historically, have been severe, such as the earthquakes of 1930, 1950 and 2004. To address any potential impacts due to seismic activities, provisions of the Bangladesh National Building Code (BNBC) 1993 and 2006 shall be strictly followed in the detailed designs of project components, apart from consideration of seismic vulnerability in the specifications for the design and construction of the works, including the choice of materials and methods for construction work.

D. Brief Socio-economic Condition of Daganbhuiyan Pourashava

6. Daganbhuiyan Pourashava was established in 2000. It is an "A" category Pourashava located at Daganbhuiyan upazila headquarters (H.Q) in Feni district under Chattogram division. Daganbhuiyan Pourashava area of about 13.25 square kilometers are 9 wards of Daganbhuiyan Pourashava. The Daganbhuiyan Pourashava is not industrialized Pourashava. Daganbhuiyan Pourashava has about total permanent and temporary population of 50 thousand. Total voters are 24,253 and Education Rate is 75%

Baseline survey of Pourashava /2022

Daganbhuiyan Pourashava Area has important facilities including Govt. Primary School - 11, High School -5, Collage -3, Madrasha -3, Post office -1, Dackbanglo-1, Community clinic -1, Govt. Hospital -1, Non. Govt. clinic-11, Mosque -23, Temple -3, Govt. and Non-Govt. Bank -10, Bazar-4, NGO -10

The total holding numbers of the 09, words under pourashava are 6,137 no's and total population is 32,080 no's Male 16,089 Female 15,991 no's under this pourashava. The communication facility of the area includes: 13.25 Sq .km of which RCC road is .850 km, Bitumen Carpeting roads is 55.88 km CC road is 0 km, HBB road is 0 km and Brick Soling Road 14.57km Khacca Road 3.46 km, there are many culverts, total 20.63km drains were good before but without taking proper maintenance actions, mostly are in bad condition. Most of the roads have huge and several connectivity facilities to reach Chattogram-Comilla Highway other upazilas and districts at in and outside of the Pourashava. As such, it is deemed necessary to construct /improve/ develop its' all roads all year round for smooth transportation mobility. It plays as junction point for transportation network for the inter district travelling facilities.

7. Total Residents holdings number is 6137 it is learned from Pourashava Mayor that about 60 % of the holding taxes are paid every year, which helps to pay the salaries of the Pourashava staff. But he does not know the reason about the rest to tax who do not pay regularly.

Source: Baseline survey of Pourashova /2022

8. The average Monthly income range of the inhabitants of the Pourashava is presented in the following table 2 (Total Residential, commercial, and non-government) Holdings number is: 6,137)

Table 2: Monthly Income range¹ of Daganbhuiyan Pourashava Residents

Class	Income sources (Per Month)	Total Holdings
Poverty	5000 -	850
Low Income	5001-10000	1395
Medium Income	10001-20000	2685
High Income	20001+	1287
Grand	6137

Others	10%

Source: Baseline survey of Pourashova /2022

9. The communication facility of the area has huge connectivity with other upazilas and districts including Comilla and Chattogram. The proposed subproject area is legally owned by the Pourashava and no land acquisition is required but 20 Trees will be affected to Implementation this sub-Project. it will not affect any people living at surrounding areas. Moreover, it will create the employment opportunity for the local people hence will help in reducing the unemployment problem of the people of Daganbhuiyan Pourashava. It will also create the revenue generation avenue for the Pourashava and will help the Pourashava in attaining the sustainability of the institution.

10. For Package No IUGIP/DAGA/UT+DR /01/2023 in total, three (3) roads and two (2) drains include construction and Improvement subproject selected for Daganbhuiyan Pourashava under IUGIP, LGED is the outcome of the feasibility study conducted during by the PMU. Under Field Visit, a preliminary Social Safeguard Impact Assessment (SSIA) was conducted comprising a long list of proposed schemes combining roads, drains and other urban facilities components. At this stage of project implementation, PMU Social Safeguard Team conducted resettlement and social impact assessments in detail on the aforesaid design completed and for implementation of subproject, comprising 3 roads (1,988 meters), 2 drains of 1,040 meters for the concerned package. This social impact assessment for the design completed schemes of the sub-project was done conducting a thorough investigation of different social safe guard issues visiting each of the scheme site based on the final detail engineering design prepared by Engineering Consultant to fulfill the requirements of ADB's Involuntary Resettlement and Safeguard Policy Statement (SPS, 2009). The major objective of the above study /investigations was to assess and identify all the possible socio-economic and resettlement impacts with necessary mitigation measures of different concerns. This report has been prepared only for the design completed schemes of 3 roads and 2Drains. However, the current subproject covers construction of the foresaid roads selected within the Pourashava to facilitate proper communication/ transportation and improved communication network for the people of sub-project area. During investigations, it was revealed that the roads that been selected and so far, completed detail design for implementation will be constructed/ improved respectively on the existing roads and will be constructed including road shoulders without affecting any structures. Moreover, due to construction/improvement of the foresaid roads under the project are not expecting to have neither any physical nor any economic displacement of any people. As a result, there is no possibility of new land acquisition and no structure affected and none found to require relocation, consequently no resettlement impacts are anticipating. Under the circumstances, this report may be treated as a Due Diligence Report (DDR) with respect to social safeguard issues for the concerned sub-project.

II. PROJECT BACKGROUND AND DESCRIPTON

- 11. Improving Urban Governance and Infrastructure Program (IUGIP) under LGED is carrying out program for its selected Pourashavas. Daganbhuiyan Pourashava under Feni district is one of the selected Pourashava. The project has been initiated for development of different infrastructure facilities under the project area for the city dwellers to improve the existing condition. The project aims at enhancing growth potential and improving environmental sustainability of the targeted city regions through effective regional urban planning. The project is supporting development of key urban infrastructures, focusing on urban environment and local economic development through strengthening municipal management and capacity building for effective and sustainable urban development.
- 12. This IUGIP project has been formulated as a sector loan will be implemented by LGED and, to be financed by ADB, AFD & GOB for implementation. The sub-projects under the IUGIP are being selected and implementing are expected to enhance economic activities in the regional context and to provide opportunities for investment, including: (i) comprehensive urban planning and economic revitalization; (ii) transport infrastructure upgrading, public transport, (iii) water supply, and, sanitation; (iv) solid waste management; and (v) strengthening local governance and municipal funding. The project comprises of three components. These are:
 - Municipal governance improvement
 - Municipal infrastructure and service improvement
 - Municipal capacity development.
- 13. The Asian Development Bank (ADB) fielded a fact- finding mission (the Mission) to Bangladesh on 7-20 November 2022 for the Result Based lending (RBL) for Improving Urban Governance and Infrastructure Project. The Mission's objectives were to (i) confirm the Loan and TA processing timeline for the proposed RBL Project; (ii) discuss and agree on the Project boundary and scope to cover; (iii) review the status of the action plan of ADB's July 2022 Project preparatory review mission; and (iv) confirm ADB's due diligence on technical, economic and financial, safeguards. Agene Francoise De Development (ADF) participated in the Mission and joined field visits. The Mission held discussions with various agencies of the government, including the Economic Relations Division (ERD) of the Ministry of Finance (MOF), Planning Commission, and Local Government Division (LGD), of the Ministry of Local Government, Rural Development and Cooperatives, Local Government Engineering Department (LGED). Asian Development Bank (ADB) will approve the Loan for IUGIP for development of selected 63 Pourashavas in the country.

A. STUDY METHODOLOGY

14. The Junior Resettlement/ social Safeguard Specialist visited the Daganbhuiyan Pourashava selected design completed scheme sites under the Subproject at the Pourashava in January 2024. The main purpose of the field trip was to conduct a detail assessment/ study for the selected schemes of the subproject covering different resettlement and social safeguard issues likely to occur due to the construction and improvement of the selected schemes. In course of study, consultant had discussions and sharing of ideas with Mayor, Panel Mayor, councilors, Executive Engineer, Poura Nirbahi Officer, Assistant Engineer along with other relevant engineers and staff of the Pourashava at their office. During discussions, the consultant briefed them about the objectives and the purpose of the visit and informed them about the planned site visit and different activities to be carried out along the alignments of the selected subproject/scheme sites. The consultants also had a number of consultations with the local people and beneficiaries at different locations of the subproject during 30 January, During site visit, Mayor, Executive Engineer, Assistant Engineer, Municipal Engineer, councilors of the concerned wards along with other technical staffs of the Daganbhuiyan Pourashava accompanied the consultant's team to assist them and also to identify the locations and alignments of different schemes. In accordance with the

objective of the field visit, the consultants visited all along the drains alignment and investigated about the resettlement and social safeguard issues if any, likely to occur for the selected roads and drains under the sub-project using an Involuntary Resettlement and Indigenous People impact assessment checklist.

III. SUBPROJECT DESCRIPTION

- 15. Daganbhuiyan Pourashava is one of the Local Government Administrative units of Bangladesh and categorizes as class "B". The Pourashava is located in the district of Gazipur. Daganbhuiyan is an important area but There are no having a good number of big multinational factories, handloom entrepreneurs' business centers and new more small industries are growing in that area. Further it is the junction point of road network for other important districts and upazilas. Many industrial establishments are gradually developing within the Pourashavas area of Daganbhuiyan The population of the area is steadily increasing due to civic amenities.
- 16. However, day by day rapid urbanization in and around the Pourashava and newly growing business sites and cultural heritage increases its importance with a significant increase in population in the Paurashva area. To cope with the current demand of increasing population of the Pourashava, rapid development of different civic facilities for dwellers of Pourashava is now becomes inevitable. Under the circumstances, this subproject has been proposed comprising of different infrastructure development under different components. The subproject components of the Pourashava aim at upgrading and expansion of urban services, four roads and two drains. The proposals will entirely concern with activities which address the most acute needs for better urban services and facilities to inhabitants of the Pourashava. Different infrastructure development components under the subproject proposed for construction and development is consistent with the Improving Urban Governance and Infrastructure Program (IUGIP) objectives. Through implementation of the proposed schemes under the subproject is expected to facilitate improved communication system, improved drainage network and other income generating Municipal Facilities for the residents of the Pourashava. The roads and drains components undertaken for required development located within different wards (word no -1,3, 4,5) of the Daganbhuiyan Pourashava area.

A. IMPACT AND OUTCOME OF THE SUBPROJECT

- 17. Physical, social and economic displacement is an inevitable part of development. Hence RCC road construction, Improvement and widening, and construction of roads and drains as selected roads in the urban areas are the main subprojects in the Pourashava under this package. In most cases these facilities are created based on fulfilling short term needs. Therefore, normally no land acquisition is proposed for the Pourashava development plan (PDP). Most of the development subprojects in the Pourashava are taken on the existing land of Pourashava. In these cases, there is no minor demolition of the extension portion of any houses or shops and makeshift shops or temporary houses of poor as squatters are physically found. As the total land is owned by the Pourashava, there is no loss of livelihood scopes.
- 18. The sub-project covers construction and improvement of roads and drains to extend facilities for the urban dwellers in the sub-project location and will bring direct benefit to the inhabitants of the Pourashava area. The roads and drains construction/ improvement under the program will improve transport facilities networks connected to all kinds of commercial premises and easy access to all market's facilities under the Pourashava etc. Thus, this sub-project is expected to increase area coverage of improved economic, education, health facilities and will guarantee standard environmental condition and

reduce transport cost of goods and services including travelling cost of the residents of the town. The outcome of the sub-project will improve transport system including drainage facilities within the Pourashava area and also will prevent water logging problem (at household site that resulted in unhygienic condition/environment as well as to the community) and unexpected flood during monsoon. The present sub-projects of roads and drains are therefore, designed for an expansion of transport facilities system, drainage networks including improvement of the transport system to meet the present and calculated future demands for the citizens of Pourashava. The sub-project expected to improve the service standards with respect to proper transport facilities network and drainage system and its effective management including lighting facilities in the Daganbhuiyan Pourashava.

B. SUBPROJECT Impacts, BENEFITS and Anticipated Negative Impacts

- 19. **Employment and Poverty Alleviation.** The roads subproject investments will contribute to eradicating poverty by promoting the expansion of employment and business opportunities. Labor intensive technologies will be adopted during the construction phase which will create short-term employment opportunities for those in the Daganbhuiyan Pourashava's skilled and unskilled labor force.
- 20. Long-term employment opportunities will subsequently be created during each subproject's operations phase particularly in relation to the activities. It is also expected that the subproject investments on basic urban and economic infrastructures will encourage private sector investments there by creating more business and employment opportunities.
- 21. Through construction and improvement of drains under the sub-project is anticipated to bring various quantifiable benefits. Availability of good transport facilities and improved drainage system will add to improve both the quality of life, and living condition of residents, easy transportation with low cost, which will bring new avenues for investments and consequently will boost up economic development. Extended benefits will include employment opportunity of local people in construction (civil) works and thus to receive short-term socio-economic benefits. To ensure benefits to local people, the contractors will be required to employ labor force from local communities, particularly within the vicinity of construction sites as much as possible. The main beneficiaries of the improved roads and drains for the citizens of Daganbhuiyan Pourashava will be provided with better transport facilities to a considerable number of populations of the town. This will improve the quality of life of residents of the city as well as raising standards of both individual and public health. Moreover, the sub-project will bring economic gains to local people in the form of increased employment and while spending less on health care & transport, will save money leading to improve in livelihood standards significantly.
- 22. **Anticipated Negative Impacts:** The identification of negative impacts that may arise from the implementation of the subprojects should give particular attention to the urban poor, women and girls, youth, the differently-abled and other marginalized groups. The needs of these groups should be addressed in the design and construction of the subprojects.
- 23. Local people, including women, should be given the opportunity to be engaged as construction workers, and as sub-contractors. There are no indigenous people or cultural heritage sites that will be affected during the implementation of the subprojects.
- 24. **Overall Social positive Impact:** On the overall, the outcome of social screening confirms that local people¹ are positive about the implementation of the subprojects. If 3 roads and 2 drain are developed will be benefited. Because the people of this area have been suffering from problem for a long time. If the roads constructed people can travel easily. If the drain works is improved waterlogging will be eliminated.

C. SOCIAL IMPACT ASSESSMENT FOR THE SUB PROJECT

25. **General:** The Junior Resettlement /social safeguard Specialist conducted the social impact study visiting sub-project sites in 30 January, 2024. The main purpose of the study was to assess and quantify resettlement and social safeguard issues. During site

investigations, consultant had discussions and sharing of ideas with the Mayor, Panel Mayor, councilors, Executive Engineer, Assistant Engineer along with other relevant engineers and staff of the Pourashava at their office at Pourashava office and also conducted meetings with the local people, local government representatives in the subproject area. However, during field visit program, consultant physically visited all the designs completed road and drain alignments selected for construction and improvement under the sub-project and investigated about likely impacts on the people with respect to land acquisition and resettlement and other social safeguard issues. An IR impact checklist with required verification of the sites is attached with this report as annexture-1. During site visit, Panel Mayor, councilors, Executive Engineer, Assistant Engineer, and a surveyor of the Daganbhuiyan Pourashava accompanied the consultant to assist in identifying the locations and alignments of the proposed roads and drains etc. organized consultations/meetings with the local representatives and people of the sub-project area. The major findings of the social impact assessment study have been summarized below:

Table 4: Social Impact Assessment of Road and Drain Subprojects

			Total Drain (B) =	1040m				
			Grand Total (A+B) =	R = 1988m D = 1040m				

- 26. It was revealed from the study that the roads and drains under this sub-project selected for construction under the IUGIP is expected to facilitate improved transport system and enhanced business facilities and drainage networks for the residents of the Pourashava area. During discussions, it was reported by the Pourashava representatives and officials, particularly the local residents and local representatives that the migration of population in the city in every year are causing severe problems to city dwellers due to insufficient civic facilities particularly in consideration of the existing roads, drainage or coverage of other urban facilities etc. They were expecting that implementation of this sub-project within the Pourashava area could solve the current problem of the residents at a greater extent. The proposed roads and drains selected under the sub-project were a long demand of the people of the city.
- 27. During site visit, consultant investigated about the existing condition of the roads and drains and their alignments emphasized on land acquisition, resettlement and rehabilitation issues. Important findings of the study in connection to IR and social safeguard issues is that the improvement/constructions of the roads and drains were found to be carried out on the available existing roads and shoulders along the edge of the existing roads. These construction works of the roads and drains under the subproject will neither require nor involve any land acquisition. In fact, there are no structures, houses, shops, or any other establishments found to be affected on the proposed roads alignment, being construction activities will be carried out on the existing road's ROW including the shoulders at the edge of the existing road alignment. As a result, no dislocation, displacement or demolition of houses or structures will be required due to the development. Moreover, on the way to different sites, consultant also had meetings/discussions with some local people about the necessity of these roads and their improvements. All of them unanimously, welcomed the project and narrated the current situation and sufferings of city dwellers due to poor and dilapidated condition of the roads and not having proper drainage system. So, the people discussed/ consulted were found interested and urged for immediate construction/ development of sufficient number of roads including drains within the Daganbhuiyan Pourashava area. Most of the participants during discussions showed positive attitudes to the proposed sub-project improvements. None opposed the sub-project. The public views and suggestions to minimize the likely adverse impacts and to enhance positive impacts due to the sub-project implementation have been noted and incorporated in the report. In this connection, they assured the to extend all sorts of cooperation and participation during construction/development of this sub-project.

IV. Land Acquisition and Resettlement

- 28. Physical, social and economic displacement is an inevitable part of the development. But here road widening and construction of drain are normally will be carried out on existing land of the Pourashava. So, there is no scope of land acquisition.
- 29. The implementation of the subprojects will be carried out within existing public rights-of-way (ROW) and there will thus be no resettlement issues. The summary results of the resettlement screening are given below:
 - No additional public or private lands will be required for the subproject outside the public existing rights of way. As such no Resettlement Action Plan (RAP) will be needed for the Sub-projects;
 - ii. No private, public, community, or cultural property of any kind of service delivery facilities as well as commercial activities will be affected;
 - iii. A phased approach to the construction of the roads, drains and streetlights shall be applied in order to minimize the disruption of business located along their alignments. If required, planks/platforms shall be installed to facilitate the entry and exit of customers and business people alike;
 - iv. Agricultural or industrial productivity will not be hampered by the proposed subprojects;
 - v. Felling of small trees located may be needed, and a replantation program shall be put in place during the implementation of the subprojects;
 - vi. Preparation of resettlement action plan (RAP) will not be required for implementing the subproject
- 30. In case it is found during detailed design or implementation that a subproject will require resettlement, activities will be subject to considerations and criteria that are consistent with the ADB's policy while taking into account the temporary nature of the displacement. The objective is to minimize disruption to the affected population. Special consideration should be given to avoiding irreversible negative impacts (such as permanent loss of employment), providing satisfactory temporary services, and, where appropriate, compensating for transitional hardships.
- 31. Acquisition if found necessary, shall entail the payment of compensation to the legal owners. Displaced persons shall be resettled and rehabilitated under the ADB's Safeguard Policy Statement-2009. Any person displaced either titled or non-titled will be compensated for their losses.
 - a. Cash compensation equal to lost income for one year, based on tax record or, in its absence, comparable rates from registered businesses of the same type with tax records
 - b. Provision of retraining, job placement, additional financial grants and microcredit for equipment and buildings, as well as organizational/logistical support to establish Affected Person (AP) in alternative income generation activity.
 - c. Livelihood restoration and rehabilitation program may be included in the subprojects.
- 32. **Squatters and encroachers:** Squatters are socio-economically vulnerable persons or households, who do not have legal rights to the affected lands, but use them for residential, commercial or livelihood purposes. Encroachers are vulnerable and non-vulnerable persons or households who extended their possession into the affected public

lands. The squatters and encroachers, if displaced, will not be compensated for lands but only for assets built or grown on the land they occupy. Pourashava will identify the eligible affected squatters and encroachers.

- Owners of displaced businesses: Compensation for income loss from businesses that is displaced from private lands. Compensation/assistance will be given to the actual owners of the affected businesses.
- Rental income earners from built premises situated on private lands: Affected rental income earners from built premises situated on private land will be compensated for loss of income. Those who earn rental income by erecting buildings/structures on Pourashava and other public lands will be ineligible for compensation/assistance.
- **Usufruct rights holders of affected land/property:** Owners of affected business, agricultural, fisheries and other activities on formally leased-in government land, where leases stipulate compensatory conditions in cases where lands are taken back or acquired before lease expiration.
- 33. **Cut-Off-Dates**: Eligibility of affected persons for compensation and assistance will be governed by eligibility cut-off dates as well. These dates will be established to identify the non-land assets that will qualify for compensation and discourage abuse of the mitigation policies by defrauding the project. These are the dates on which censuses of the affected persons and assets are completed on particular area (mauza/Ward/village). No person or his/her assets will qualify for compensation directly through Pourashava unless they are recorded in the census taken on the cut-off date.
- 34. Contingency for Displacement Fund and Public Consultation: A Contingency or Displacement Fund may be allocated in the event of the need to compensate temporary business losses, damages to minor structures, felling of trees, and unforeseen losses. This may be equivalent to 5% of total construction cost.
- 35. Land Acquisition & Resettlement: The infrastructure improvements under IUGIP could have resettlement impacts. However, this selected sub-project at the Pourashava under IUGIP comprises four roads and two drains of the Pourashava. In this connection, an indepth social impact assessment was conducted based on the design completed schemes only to examine these issues, particularly with respect to the requirements of the ADB Policy on Involuntary Resettlement (1995), Social Safeguard Policy Statement (SPS) 2009, National Resettlement Policy -2009 under Ministry of Land (2009) national legislation of the Government of Bangladesh, Acquisition Requisition of Immovable Property Act-2017 (ARIPA-2017). The social safeguard study for the design completed schemes at the Pourashava suggests that there is no possibility of new land requirements, being improvement of the roads and drains will be done on the existing ROW and land is available belong to Pourashava and the road shoulders on available land. The ROW allocated for the roads and drain schemes also were confined through design prepared by MDS Consultant using existing road's ROW and the shoulders at edge of existing road shoulders. It was revealed through physical investigation that the proposed sub-project impact does not extend over any privately owned or any other new land for undertaking civil works. As such no land acquisition and resettlement will be required. Besides, the proposed ROW for the design completed road and drain under the sub-project, there is no possibility of affecting any structure and none found to be required relocation. Moreover, there is no possibility to loss of livelihood, neither permanent nor temporary due to loss of land/assets occupied or squatting by anybody is expected for the proposed development. Some minor impacts might be happened but this will be minimized by alternative arrangement. Based on final design of the sub-projects during implementation and construction work, all the probable resettlement impacts will be reviewed and necessary mitigation measures will be taken. Therefore, the potential impact of the sub-projects on privately owned land/assets was fully eliminated, and correspondingly, no issues relating to involuntary Resettlement will occur during implementation of the sub-project. Although,

concerned road schemes unlikely to have any IR or resettlement impact. However, the construction/improvement of the subproject may cause only minor temporary disturbances limited to dust and noise, movement of people etc. which will be limited to the construction period only, and could easily be mitigated as described in this report. Summary of land acquisition and resettlement impacts which has been assessed using a standard IR checklist undertaking a complete transect walk for the subproject annexed with this report (Annexure-1).

A. MITIGATION OF SOCIAL CONCERNS

- 36. Although the road schemes under the subproject construction/ improvement is not expecting any land acquisition and involuntary resettlement, either physical or economic displacement, or temporary restrictions to land use. However, some assumptions were made that during civil works for different schemes, pedestrians, residents and shopkeepers/different business operators carrying out different economic activities particularly beside the road; customers might face temporary disturbances in connection to movement and operate their business. In order to avoid even minor temporary disturbances during the construction activities, the following measures are suggested to eliminate such impacts:
 - ➤ Informing all residents local households and traders about the nature and duration of works in advance, so that they can make necessary preparations to face the situation.
 - Providing wooden walkways/planks across trenches for pedestrians and metal sheets where vehicle access is required and proper precautions and barricade will be provided to avoid accidents into the ditch for children, women, elderly people and handicapped and vehicle. Also, proper signboard, milking, leaflet and communications are essential in this connection. Necessary alternative road network and diversion of traffic will be mandatory for this. Project authority and contractors will be liable and compensate any loss or damage for this for negligence of contractors and this should be included in the contract document and procurement policy of the contractors.
 - Increasing the work force and using appropriate equipment to complete the work in a minimum timeframe.
 - Suggest people to wear (PPP gadgets) especially mask to prevent from dust problem during construction and also routine water spray is essential to avoid and minimize dust in the air and nearby residence.
 - Other social concern, if any will be properly solved by Grievance Redress Committee (GRC) under the Grievance Redress Mechanism (GRM) of the project already formed by the PIU/MDSC
 - Pourashava will prepare Social Action Plan (SAP), Gender Action (GAP), Poverty Reduction Plan and Stakeholders Engagement Plan in this connection. Gender segregated data will be preserved thorough routine monitoring of implementation work and Pourashava will preserve baseline information of pre project, during project and post project evaluation by formation of social development unit of the Pourashava.
 - Any other preventive measures to be adopted as required considering the situation during construction.
- 37. Therefore, the above mitigation measures during civil works would not impede local resident, pedestrians 'customers and clients from shopping locally or using the usual services from local businesses.

B. COMMUNITY CONSULTATION

- 38. One (1) Numbers of Focus Group Discussion Meeting (FGD) was conducted on 30January, 2024, in the project sites as a part of information dissemination about the upcoming subproject implementation. Details are in the Annexure-07. The major objective of such consultations was to identify different issues, problems/constraints and prospects and feedback from the participants in connection to different development activities under the subproject. Consultation is a continuous process which requires holding meetings from the very beginning of the project preparation to implementation of the project. The consultations conducted so far were mainly covering information dissemination about the project /subproject and its scope, possible positive and negative impacts includes necessity of land acquisition, procedures of compensation valuation for the affected land and properties, payment of compensation, APs/local people's opinions /feedback on different social issues and concerns e.g. fair compensation, grievances, local demand, involvement of APs and local people in different project activities and employment in project works etc.
- 39. However, Stakeholder consultations meeting/Focus Group Discussion (FGD) were conducted at Pourashava office on 30 January, 2024, with the Pourashava Mayor, Panel Mayor, councilors, officials, TLCC, WC members, local representatives, and local community people to assess the IR impacts. The consultations were covered mainly to inform project stakeholders include project affected and beneficiary people about the project concept, its objectives and different social safeguard issues, land acquisition requirements etc. as per technical design of the subprojects. They were also consulted to know about their perceptions on risks and consequences of the subproject development concerns, views on alternative options and beneficiary participation in Project cycle. The potential affected persons along with local residents/community leaders and other stakeholders were consulted through group meetings and personal contact. The inputs from the stakeholders' meetings have been used to develop appropriate mitigation measures. This interactive approach will continue during the implementation of the subproject. The findings of the above consultations revealed a lot of positive impacts in spite of a few temporary impacts/concerns limited to construction period only, which have the scope of mitigation.

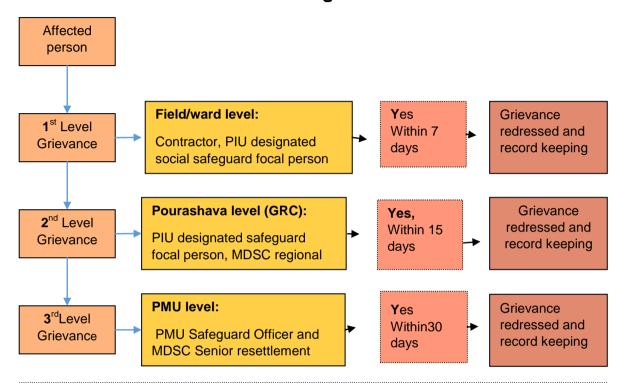

C. GRIEVANCE REDRESS MECHANISM (GRM)

- 40. In case of grievances that are immediate and urgent in the perception of the complainant, the Social Coordinator, Contractor and Social Safeguard and Environment Specialist from the project management and supervision consultants (MDSC) Project Management and Supervision Consultant (PMSC) on- site will provide the most easily accessible or first level of contact for quick resolution of grievances. Contact phone numbers and names of the concerned PIU safeguards assistant, contractors, PMU safeguards officer (MDSC) environmental and social safeguards specialists will be posted at all construction sites at visible locations.
 - a) 1st Level Grievance. The phone number of the PIU office should be made available at the construction site signboards. The contractors and PIU safeguard focal person can immediately resolve on-site in consultation with each other, and will be required to do so within 7 days of receipt of a complaint/grievance.
 - b) **2nd Level Grievance.** All grievances that cannot be redressed within 7 days at field/ward level will be reviewed by the grievance redress cell (GRC) headed by Panel Mayor of the Pourashava with support from PIU designated safeguard focal person and MDSC regional environment and resettlement specialists. GRC will attempt to

- resolve them within 15 days. The PIU designated safeguard focal person will be responsible to see through the process of redressal of each grievance.
- c) 3rd Level Grievance. The PIU designated safeguard focal person will refer any unresolved or major issues to the PMO safeguard officer and MDSC national environmental and resettlement specialists. The PMO in consultation with these officers/specialists will resolve them within 30days

Figure 6: Grievance Redress System

GRM Diagram

Note: GRC = Grievance Redress Cell; PIU = Project Implementation Unit; MDSC = Management. Design and Supervision Consultants; PMU = Project Management Unit.

- 41. 1st Level Grievance, Pourashava Level PIU. The contractors, PIU Safeguard and Gender Focal person can immediately resolve issues on-site or at Pourashava level in consultation with each other with the support of Administrative Officer of Pourashava, designated municipal ward councilor and will be required to do so within 7 days of receipt of a complaint/grievance. Assistance of ward level coordination committees (WC) will be sought if required for resolution of the issue, by any one or all of them jointly. The first level grievance redress team will be comprised of the following members:
 - i. Chief Executive Officer Chief Executive Officer or Poura Nirbahi Officer
 - ii. Executive Engineer, Pourashava/ Safeguard and Gender Focal person
 - iii. Administrative Officer, Pourashava (will act as secretary GRC level-1)
 - iv. Pourashava Ward Councilor(designated)/ WC member

¹Grievance redress cell (GRC) will have been formed at Pourashava-level. For example in Pourashava, the GRC comprises Panel Mayor as Chairperson, and 1 councilor, the Pourashava Executive Engineer, Secretary Pourashavaand Pourashavaadministrative officer, as members. All Pourashava-level GRCs shall have at least one-woman member/chairperson and AP representative or independent NGO as committee member. In addition,forproject-relatedgrievances,representativesofAPs,community-basedorganizations(CBOs),andeminent citizens must be invited as observers in GRCmeetings.

- v. Environment Health Safety (EHS Supervisor)/Social Coordinator, Contractor
- vi. Affected Person's Representative/ Community or NGO Representative of project Area
- 42. **2nd Level Grievance**, **Pourashava Level**. All grievances that cannot be redressed within 7 days at WARD level will be brought up to the Second level grievance redress team headed by the Panel Mayor. Construction Supervision and Safeguards Engineers /Asst. Supervision and Safeguards Engineers, MSDC/PMSC at Pourashava level will attempt to resolve the grievance /complaint within 15 days. At the composition of 2nd level grievance redress team will be as follows:
 - vii. Panel Mayor of the Pourashava
 - viii. Chief Executive Officer or Poura Nirbahi Officer
 - ix. Executive Engineer of the Pourashava
 - x. Concerned Councilor of the Pourashava)
 - xi. Executive Engineer of the Pourashava
 - xii. Administrative officer of the Pourashava
 - xiii. One women member/ Reserve women seat councilor
 - xiv. Representative of Affected Person/TLCC member/ NGO member
- 43. **3**rd **Level Grievance**, Project Management Unit (PMU) Level at headquarter. All grievances that cannot be redressed within 30 days at 3rd level will be brought up to the PIU/PMU level. safeguards team will refer any unresolved or major issues to the PIU/PMU level grievance redress team, that will be headed by the Project Director and will have Deputy Project Director, social safeguard, environment safeguards and gender Assistant Directors and PMSC, who will resolve the complaints/grievances within 30 days. The PMU level grievance team will comprise of:
 - i. Project Director,
 - ii. Mayor of the Pourashava
 - iii. Deputy Project Director (Safeguards)/ Project Manager
 - iv. Deputy Project Manager (DPM)/ Senior Assistant Engineer (will act as member secretary GRC level-3)
 - v. Assistant Director (Environment)/ National Environmental Consultant
 - vi. Assistant Director (Social Safeguards)/ National Safeguard Consultant
 - vii. Assistant Director (Gender) *supported by* Social, Environment and Gender Specialist/ National Gender Specialist, MDSC
- 44. Despite the project GRM, an aggrieved person shall have access to the country's legal system at any stage and accessing the country's legal system can run parallel to accessing the GRM and is not dependent on the negative outcome of the GRM.
- 45. 38. In the event that the established GRM is not in a position to resolve the issue, the affected person also can use the ADB Accountability Mechanism (AM) through directly contacting (in writing) the Complaint Receiving Officer (CRO) at ADB headquarters or the ADB Bangladesh Resident Mission (BRM). Before submitting a complaint to the Accountability Mechanism, it is necessary that an affected person makes a good faith effort to solve the problem by working with the concerned ADB operations department and/or BRM. Only after doing that, and if they are still dissatisfied, will the Accountability Mechanism consider the compliant eligible for review? The complaint can be submitted in any of the official languages of ADB's developing member countries. The ADB Accountability Mechanism information will be included in the project-relevant information to be distributed to the affected communities, as part of the project GRM.

V. CONCLUSION

- 46. A due diligence process was conducted for this sub-project to examine the IR issues particularly with respect to the requirements of the ADB's SPS (2009) and Land Acquisition Policy of GOB. However, four roads of 4,350 meters' and two drains of 975 meters' construction/improvement under the sub-project at Pourashava will be a straight forward construction/improvement along the existing roads on Pourashava/ Government lands. As a result, the sub-project's drains improvement/construction will neither cross nor affect any land or any structures. Further, any disturbance will be limited to construction period only. The likely impacts are short- term, localized and could either be easily avoided or mitigated. The present report describes the findings of the study focused on the sub-project likely impacts in terms of social safeguard and Involuntary Resettlement. The results of the study suggest that the impact of this sub-project does not incur any land acquisition, resettlement or economic displacement. The reasons for this outcome are:
 - i) Construction and Improvement of the proposed roads will be done on the existing road ROW is also are encumbrance free:
 - ii) Construction of the proposed roads will be done alongside of existing roads ROW are encumbrance free;
 - iii) The population of the town along the proposed subproject alignments will hardly impede their business or any other economic activities due to construction of roads, so there should be no resulting losses in income or assets.
- 47. The sub-project is unlikely to have any involuntary resettlement impacts, thus can be classified as a Category-C considering the IR impacts. As a result, it will not require any resettlement survey and preparation of Resettlement Plan (RP). But it will require extensive consultations/discussions, with the people and beneficiaries and to ensure their participation during implementation of the sub-project to solve negative impacts if any, to expedite project works. However, safeguard compliance monitoring will still be conducted during the project implementation and civil works activities.

ANNEXURE 1:Involuntary Resettlement (IR) Impacts Checklist by Schemes of the Road and Drain of Daganbhuiyan Pourashava Package Road and Drain Sub Projects (Roads+ Drain+ Streetlights)

ANNEXURE 2: DRAFT PROJECT INFORMATION LEAFLET ON SOCIAL SAFEGUARDS ISSUES

Government of the People's Republic of Bangladesh
Ministry of Local Government, Rural Development and Cooperatives
Local Government Division
Local Government Engineering Department

Project Information Leaflet (Draft)

For

Improving Urban Governance and Infrastructure Program (IUGIP)

- 1. Introduction to the Project IUGIP: The Improving Urban Governance and Infrastructure Program (IUGIP) are under implementation by the Government for development of different infrastructure facilities covering selected Pourashavas of the country. The Project will support development of key urban infrastructure, focusing on urban environment and economic development through strengthening municipal management and capacity for effective and sustainable development. The project is implementing number of subprojects funded by ADB, AFD and GoB. The subprojects under IUGIP eligible for funding assistance include transport, sanitation, solid waste management, drainage, municipal facilities like kitchen market, supermarket development, park etc.
- **2. Implementation Arrangement:** Local Government Engineering Department (LGED) is the lead executing agency of the Project. Different subprojects to be undertaken will be implemented by a number of Implementing Agencies (IAs), such as: LGED, Pourashava as under the project area.
- **3. Subproject Selection Procedure:** The process for selection and approval of new subprojects are: PMU invited proposals from Pourashava and urban centers covered under the Project. Upon approval of the Steering Committee and no objection from ADB, a feasibility study was carried out by the Consultants following the procedure of MDS and finally is implementing those subprojects found feasible.
- **4. Land Acquisition and Resettlement of the project affected people:** The project is unlikely to have significant land acquisition and resettlement impacts. The basic principles of IUGIP are to: (i) avoid involuntary resettlement whenever feasible; (ii) minimize resettlement where population displacement is unavoidable; and (iii) ensure that displaced persons receive assistance so that they are at least as well-off as they would have been in the absence of the project.
- **5.** The persons eligible for compensation: The APs with or without title to land and properties will be entitled for compensation, resettlement benefits & assistance following the RF and the ADB policy. The APs "with" title to the lands will receive cash compensation for their affected lands, including the structures, fences they have constructed, and crops and trees planted on the lands. Those "without" title to the lands will be compensated for their structures constructed thereon, and crops and trees they have grown in the affected lands. APs eligible for compensation to be identified through a census and detail measurement survey of the affected prosperities.
- **6.** Time for conducting census and inventory of losses in the subproject area: After finalization of detail design for a subproject, concerned PIU office will mark the subproject alignments. After that consultant with support from the PIUs will conduct the census of all APs and will record the inventory of their affected properties in survey questionnaire. The properties recorded in the survey questionnaire will be the bases in calculating the compensation. The completion date of the census survey will be considered "cut-off-date" for receiving entitlements by the APs. After the cut-off-date, no new persons, buildings/ structures or cause, any kind of land use change, will be considered eligible for compensation or resettlement assistance.
- **7. Category of Vulnerable Affected Persons (APs):** i) Households below the poverty line, ii) Households headed by the elderly persons iii) Households headed by physically handicapped, iv). Households headed by women & v) Households headed by Indigenous Persons
- **8. Bases for calculating the compensation:** All unit prices for calculating the compensation for lands, structure and other affected assets will be based on replacement cost at prevailing market rates in the sub project area.
- 9. Provision of other benefits to the APs: There are various benefits e.g., income restoration,

relocation/shifting, vulnerability allowances that the APs will get from the project. In addition, APs or any member of their family will be provided with skill development trainings and also in employment during construction of the subprojects. In the long-term, the subprojects will be of great help to the people.

- **10. Responsibility of compensation Payment**: Depending on the types of loss, the Deputy Commissioner, PIU/PMU will pay compensation to APs
- 11. Procedure for resolving the grievances/issues related to compensation or other Social Safeguard Issues: A Grievance Redress Mechanism (GRM) framed for the project with the objective to receive and facilitate resolution of APs, complains &grievances to ensure project safeguard performance. The GRM should be scaled to the risks and adverse impacts of the project. It should address displaced persons concerns and complaints promptly, using an understandable and transparent process that is gender responsive, culturally appropriate, and readily accessible to all segments of the affected people at no costs. The GRM shall not impede access to the existing judicial or administrative remedies. The APs will be appropriately informed about the mechanism. The APs would have every access to file any complaint with the local Grievance Redress Committee (GRC) that established at each PIU. A focal person at each PIU level is responsible (Resettlement safeguards officer or Project Manager) to record complains from APs with convening GRC meetings, recording decisions, issuing minutes of the meetings and taking follow up action etc. The duties of the GRC are: (i) provide necessary support to APs on safeguard related issues; (ii) record grievances of APs and prioritize those that need immediate resolutions; (iii) inform the PMU of serious disputes that need to be resolved within the appropriate period; and (iv) update the APs on status of their complaints.
- **12. Public disclosure of social safeguard Documents/Resettlement Plans:** The resettlement plan or other safeguard documents of the project/subproject will be disclosed among the APs and beneficiaries in a local language. These documents will also be uploaded on IUGIP/LGED and the ADB website to facilitate dialogue with other individuals and organizations. The PMU & ADB will ensure the safeguard documents for the subprojects to receive the feedback from stakeholders' during implementation and to disseminate the necessary information about the major changes of a scheme under the subproject (if any).

ANNEXURE 3: Possible Impact Assessment Checklist

Note: This is an expanded checklist based on ADB IR Impact Assessment Checklist. The modifications are indented to facilitate quick IR assessment by PIUs of a proposed sub-project. The checklist may be modified as deemed necessary during project implementation

A. Introduction

Each sub-project/component needs to be screened for any involuntary resettlement impacts which will occur or have already occurred. This screening determines the necessary action to be taken by the Project team/design consultants.

B. Information on proposed scheme/Sub-Project:

a. District name: Feni

b. Location: Daganbhuiyan Pourashava, Upazila: Daganbhuiyan, Feni

a. Proposed scheme considered in this checklist: (check one)

Three (3) roads Two (2) drainages

C. Screening Questions for Involuntary Resettlement Impact

Involuntary Resettlement Impacts Will the Project include any physical construction work?	Yes	No	Not Known	Remarks
Does the proposed activity include upgrading or rehabilitation of existing physical facilities?	✓			
A. Land	l (<u>not applicab</u>	le for public	ROWs)	
1. Ownership of land known?	n/a	n/a		
2. Land purchase/acquisition (ar	nswer required purchase)- No		l donation and/	or negotiated land
a. permanent (owner/s required to transfer ownership/rights to Pourashava)		√		
b. temporary (owner/s retain rights/ownership)		✓		
c. not required	✓			
3. Current usage of the land known?	✓			

Involuntary Resettlement Impacts	Yes	No	Not Known	Remarks
4. Are there any non-titled people who live or earn their livelihood at the site/land?		✓		
5. Are there any existing structures on land?		√		
(if yes, complete the following information)	Not applicable			
- Residential		✓		
- Business/shops/stalls		✓		
- Fences		✓		
- Water wells		✓		
- Sanitation facility		✓		
- Others (specify)		✓		
6. Are there any trees on land?		✓		
7. Are there any crops on land?		✓		
8. Will people lose access to:		✓		
- any facility		✓		
- services		✓		
- natural resources		✓		
9. Will any social or economic activities be affected by land use-related changes?		✓		
10. Are any of the Project affected persons (PAP) from indigenous or ethnic minority groups?		√		
B. Linear Works				
1. Within public ROW?		✓		
2. Structures on ROW? (applicable to full or partial parts, applicable to permanent/semipermanent structures)		✓		

Involuntary Resettlement Impacts	Yes	No	Not Known	Remarks
- Residential		✓		
- Commercial/business/stalls		✓		
- Fence/boundary walls		✓		
- Sanitation facility		✓		
- Community facility		✓		
- School/educational facility		✓		
- Religious structure		✓		
- Service provision (light poles, water wells, etc.)		✓		
- Others (specify)		✓		
3. Any mobile vendors/hawkers using ROW?		✓		
4. Will there be loss of agricultural plots?		✓		
5. Will there be loss of trees?	√			Affected 20 no's Tress (Smal and Medium)
6. Will there be loss of crops?		✓		
5. Will people lose access to:		✓		
- any facility		✓		
- services		✓		
- natural resources		✓		
6. Are any of the Project affected persons (PAP) from indigenous or ethnic minority groups?		✓		

D. Attachments

1. Sub-Project with land requirement: Not applicable

- a. Photograph/s of site/s: not applicable
- b. Photograph/s of existing structure/s (permanent/semi-permanent): not applicable

2. Sub-Project along ROWs:

- a. Photograph/s of each alignment (chain age wise at least 200 meters): not applicable
- B. Photograph/s of existing structure/s (permanent/semi-permanent): not applicable
- C. Photograph/s of crops: not applicable
- C. Photographs of trees applicable

ANNEXURE 4: INDIGENOUS PEOPLE CHECKLIST/ SMALL ETHNIC COMMUNITIES (SEC IMPACTS

A. Introduction:

Each Project/Sub-Project/component needs to be screened for any indigenous people Impacts which will occur or have already occurred. This screening determines the necessary action to be taken by the Project team.

B. Information on Project/Sub-Project/component:

1. District name: Feni

2. Location (km): At Daganbhuiyan distance around 18 km from district headquarter- Feni

C. Technical description:

Construction/Improvement of Construction/Improvement of Roads 1,988m in 3 locations, RCC Drains 1,0401m in 2 locations, RCC Box Culvert (1) nos., 2 nos. cross drain, palisading work 771m, and installation of Street Light 69 nos. at Daganbhuiyan Pourashava, Feni District.at Daganbhuiyan Pourashava, Feni District.in the upcoming sub-project of Daganbhuiyan pourashova under IUGIP.

Screening Questions for Indigenous People/SEC Impact

KEY CONCERNS	YES	NO	Not	Remarks
(Please provide elaborations in the "Remarks" column)			Known	
A. Indigenous Peoples/SEC Identification				
1. Are there socio-cultural groups present in or using the Project area who may be considered "tribes" (hill tribes, scheduled tribes, IP/SEC), "minorities" (ethnic or national minorities), or "indigenous communities"?		✓		
2. Are there national or local laws or policies as well as anthropological researches/studies that consider these groups present in or using the Project area as belonging to "ethnic minorities," scheduled tribes, IP/SEC, national minorities, or cultural communities?			√	
3. Do such groups self-identify as being part of a distinct social and cultural group?			√	
4. Do such groups maintain collective attachments to distinct habitats or ancestral territories and/or to the natural resources in these habitats and territories?			✓	
5. Do such groups maintain cultural, economic, social, and political institutions distinct from the dominant society and culture?			✓	
6. Do such groups speak a distinct language or dialect?			✓	
7. Have such groups been historically, socially, and economically marginalized, disempowered, excluded, and /or discriminated against?			✓	
8 Are such groups represented as "indigenous peoples, ethnic minorities," "scheduled tribes," or "IP populations" in any formal decision-making bodies at the national or local levels?			√	
B. Identification of Potential Impacts				
Will the Project directly or indirectly benefit or target	✓			

indigenous peoples?		
indigenous peoples:		
10. Will the Project directly or indirectly affect indigenous	✓	
peoples' traditional socio cultural and belief practices (e.g.,		
Child-rearing, health, education, arts, and governance)?		
11. Will the Project affect the livelihood systems of	✓	
Indigenous peoples (e.g., food production system, natural		
resource management, crafts and trade, employment		
status)?		
12. Will the Project be in an area (land or territory)	✓	
occupied, owned, or used by indigenous peoples, and/or		
claimed as ancestral domain?		
C. Identification of Special Requirements Will the Project		
activities include?		
13. Commercial development of the cultural resources and	√	
knowledge of indigenous peoples?		
14. Physical displacement from traditional or customary	√	
lands?		
15. Commercial development of natural resources (such as	✓	
minerals, hydrocarbons, forests, water, hunting or fishing		
grounds) within customary lands under use that would		
impact the livelihoods or the cultural, ceremonial, and		
spiritual uses that define the identity and community of		
indigenous peoples?		
16. Establishing legal recognition of rights to lands and	√	
territories that are traditionally owned or customarily used,		
occupied, or claimed by indigenous peoples?		
17. Acquisition of lands that are traditionally owned or	√	
customarily used, occupied, or claimed by indigenous		
peoples?		

Indigenous People/SEC Impact

After reviewing the answers above, executing agency/safeguard team confirms that the proposed Subsection/ section/Sub-Project/component (tick as appropriate):

- [$\sqrt{\ }$] has indigenous people (IP)/SEC impact, so an SECDP or specific SEC action plan is required.
- [$\sqrt{\ }$] has No IP/SEC impact, so no SECDP/specific action plan is required.

ANNEXURE 5: SAMPLE GRIEVANCE REGISTRATION FORM

The Project welcomes complaints, suggestions, queries and comments regarding Project implementation. We encourage persons with grievance to provide their name and contact information to enable us to get in touch with you for clarification and feedback. Should you choose to include your personal details but want that information to remain confidential, please inform us by writing/typing 'CONFIDENTIAL' above your name. Thank you.

ANNEXURE 7: ATTENDANCE & RECORDS OF PUBLIC CONSULTATION

FGD-1

Venue/Location: South Jagatpur, Daganbhuiyan pourashova Date:30.01.24; Time:10.00

No of Participants -16

Agenda: Issues discussed

- Existing roads and drains conditions and its development;
- People's interest for development of this roads and drains;
- Potential resettlement impacts;
- Government resettlement policy;
- ADB's Involuntary Resettlement Policy (SPS-2009);
- Participation of local people for development of the proposed roads and drains;
- Participation of local community in construction, operation & maintenance of road and drains:
- Potential social and economic impacts of the proposed road, drain and others activities

A public consultation meeting was held at Daganbhuiyan pourashova for construction of the Improvement of Construction/Improvement of Roads 1988m in 3 locations, RCC Drains 10401m in 2 locations, RCC Box Culvert (1) nos., 2 nos. cross drain, brick palisading work 744m, RCC Retaining Wall 280m & installation of Street Light 69 nos. at. Ward no: 1,3,4,5 and 6, and adjacent areas, under Daganbhuiyan pourashava, Feni. The public consultation meeting was presided by Councilor Ward No. 5 of the Pourashava.

Consultants from Social Safeguard Team of feasibility survey team of IUGIP were present in the meeting. The represented participants were from concern communities, users of roads and drain beneficiaries, and representatives of local government agencies. It is mentioned here, most of the roads is bad and earthen. Some portion of road and drain remain waterlogged in monsoon, some roads are narrow and not paved and longtime remain in pot holes.

The agenda of the meeting was to communicate on the planning, improvement, reconstruction, rehabilitation of the sub-project under upcoming IUGIP implementation phase.

The Resettlement Specialist survey team member, briefed the participants regarding the goals and objectives of the Projects and safeguard issues relating to public temporary disturbance during construction period and also probable mitigation measures highlighting that there would be no land acquisition or public donation of land for the sub-project implementation as the activities will be implemented inside the ROWs and also informed the meeting that no indigenous / tribal people will be affected. The issues raised during the public consultation have been addressed in this Due Diligence Report (DDR), noting these issues would not pose any significant constraint in the implementation of proposed sub-projects.

During open discussion session, participants raised following questions, queries and suggestions:

- Participants urged the Pourashava officials to ensure quality of the work and timely completion of the task
- The participants suggested that the implementation of the sub-project would not have any impact on the livelihood of the poor and no structure should be demolished and no private land use in any form.
- The participants requested to ensure proper safety measures during construction period and alternative road arrangement for Pedestrians.

The participants requested the consultants to implement the sub-projects as early as possible and they (community) will be very eager to extend all kinds of cooperation for implementing the sub-project.

Existing road conditions and its development:

Existing Four roads and two drain conditions of the Ward 05 and 07 are fully earthen and muddy condition. Which is over flooded during rainy season and hinder the polluted and unhygienic environment condition of the community every year and the community suffer devastative. It needs immediate improvement for the smooth transport network. Further they opined that there will be no impact on any private properties, trees or human. There is no sign of IP in the area.

Perception/Findings of Community:

Existing roads and drains conditions of the two Wards are very poor and mud pathway only, which are flooded during rainy season, community suffer devastative. Local people expressed their deep concern about the welfare of the community and showed interest for development of the roads.

Action to be taken & Summary of outcome:

The participants earnestly approached to Pourashava for Road and drain development that will have good affects as a whole. The participants appreciated LGED and ADB's Resettlement Policy for eligibility criteria, entitlement for compensation and resettlement assistance, as well as the provisions of the approved Resettlement Framework for the project. Proposed roads will create social and economic benefit for the local poor and vulnerable people through contributing in income generation and employment.

The meeting concluded with thanks from the chair to the participants. A list of participants and Photographs of Focus Group Discussion (FGD) are given below:
